
Preface

This book and the statements of the authors are intended to respond to the professional needs of the reader. The case law interpretation and the presentation of scenarios should not be considered statements of final authority. Only a court of law, guided by individual case facts, can be considered the authority on a specific issue. That issue may be treated differently from court to court and state to state. Legal requirements and accepted customs can and do vary greatly between and even within states and can change often.

This book serves a generic purpose for the education profession and provides only suggested guidelines. While this book is designed to provide accurate and authoritative information in regard to the subject matter covered, it should not be considered a forecaster of impending or future litigation. It should also be noted that any guidelines suggested must be treated with caution in light of the specific subject matter examined and the expected level of personal involvement.

In publishing this book, neither the authors nor the publisher is engaged in rendering legal service. If legal advice or assistance is required, the services of a competent attorney should be sought. In "Annie's Case," all events should be considered fictitious and hypothetical, and any resemblance to real people or specific incidents is coincidental.

Acknowledgments

The authors wish to acknowledge the hard work of, and thank, the SGD Writing Center, especially Sandy, for the exemplary manuscript editing, proofing, and support for us as we developed this book. As always, when we were "muddy" with our words, sentence structure, or direction, they provided the "soap and water" and, when necessary, even bandages for our occasional "authors' egos."
